1. In a memorandum dated 3 July 1952, the Assistant Director, Research and Reports, Central Intelligence Agency, suggested that CIA and Directorate of Intelligence representatives meet for the purpose of exploring means to effect closer cooperation in the exploitation [redacted]. The need for remedial cooperative action in this field of intelligence is appreciated; hence, this proposal is concurred in.

2. Satisfactory exploitation [redacted] in the Directorate of Intelligence will require certain cooperative action with other intelligence agencies. Issuing jointly endorsed requirements, establishing standard reporting and processing techniques, and providing close liaison between analytical groups, are steps sufficient to meet our needs. It is not considered necessary to go beyond this at the present time.

3. The Air Force will establish close liaison and cooperate in the exploitation [redacted] as outlined above.
